SCHOOL

THE TRIUM SCHOOL

Mind Body Soul

Three forces.
One balanced education.

At Trium, we believe every child should grow with a curious mind, a strong body, and an expressive soul.

Through academics, sport, music and art, we help children become **confident, capable** and **future-ready.**

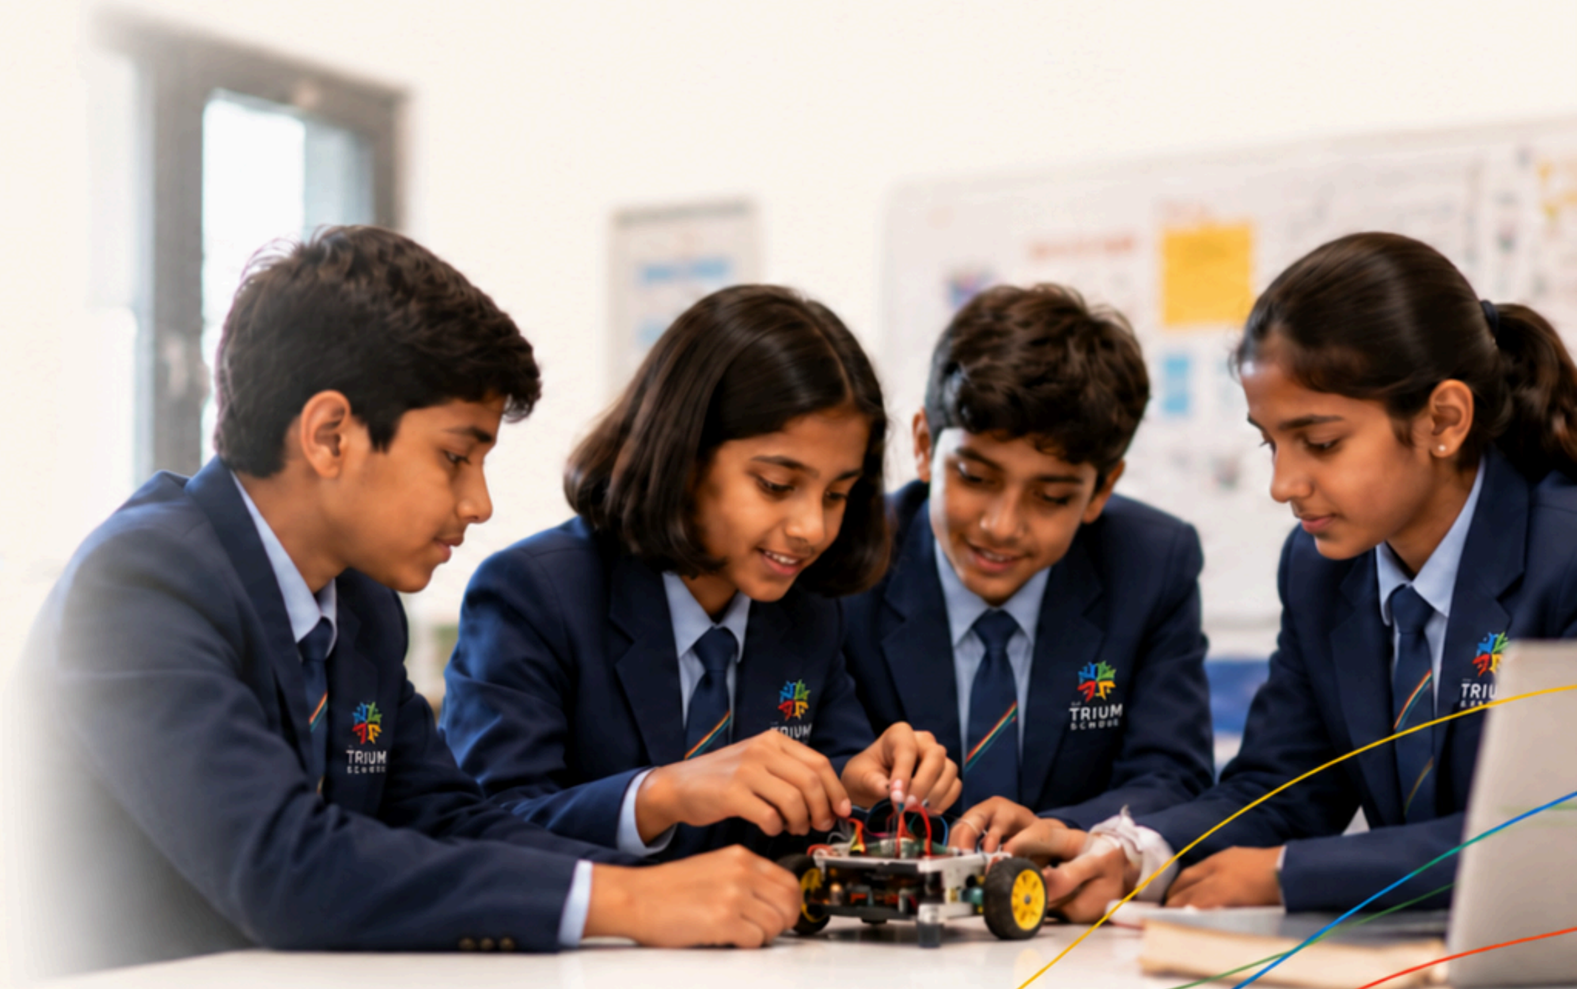
Curious Mind

Strong Body

Expressive Soul

“Yesterday’s Schools Prepare for Tests, Not Life

Most classrooms remain anchored in old models that separate academic rigor from real-world relevance.



FOUNDER’S MESSAGE

At Trium, we don't see our role as simply educating children. We see our role as awakening the three forces within them — Mind, Body and Soul

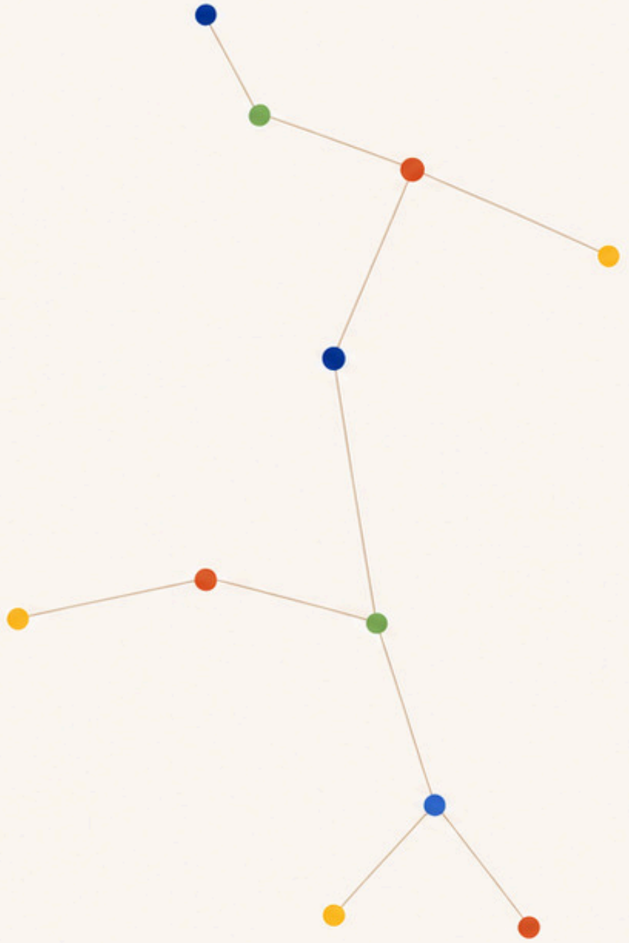
Education has always claimed to develop the whole child. Our ancient gurukuls trained students on “sastra” (warriorship) and “shastra” (scholarship) alike. And yet, at present, if we're honest, most schools still measure only one thing: what a child can recall on a test.

The world our children inherit will not reward a strong mind housed in a neglected body, or a disciplined body driving an unexamined soul. It will reward integration — the ability to think clearly, move with strength and resilience, and act from a place of purpose and values.

Our responsibility is not to produce high scorers but to raise whole human beings. Not minds trained only for exams, but minds that can think, question, and adapt. Not souls left untended, but children who grow up knowing what they value and why.

Intelligence without ethical grounding is brittle. Strength without direction is wasted. And neither means anything without a soul that knows why it's doing what it's doing.

Trium — “of three” — is not a metaphor to us. It's our architecture.



What skills should the leaders of tomorrow hold?

Beyond Right Answers, Towards Remarkable Thinking

The next decade demands thinkers who can navigate ambiguity and lead through complex global challenges.

The Trium Edge

Learning for Life

A progressive CBSE curriculum

Super Teacher

Master educators with AI powered teaching excellence

Trium Orator

Cultivating a stronger voice

Trium Innovators

Encouraging curiosity that builds tomorrow

KNOWLEDGE
CHARACTER
CONFIDENCE
BRIGHTER TOMORROWS

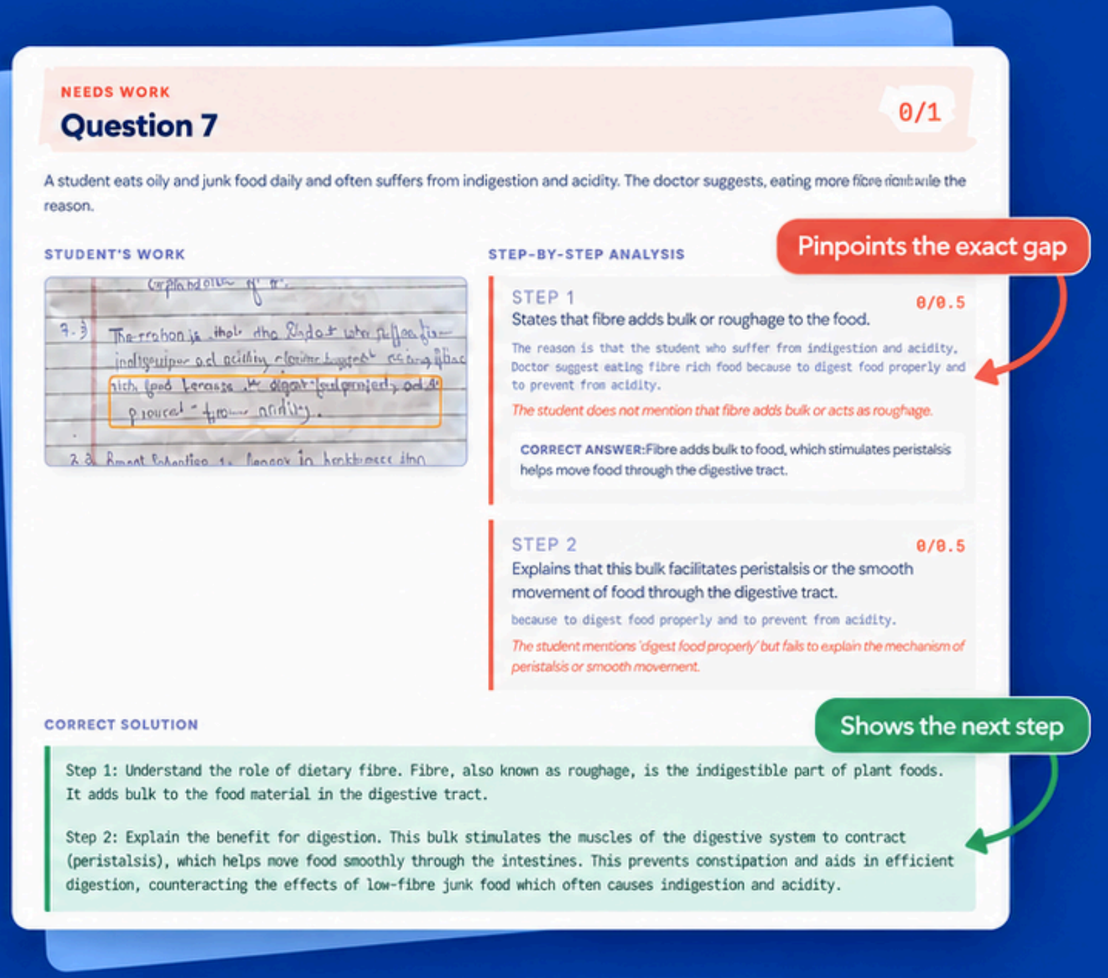
FOUR STRENGTHS, BRIGHTER TOMORROW.

AI-POWERED SUPER TEACHERS

Every mistake becomes a learning moment.

At Trium, every child may learn differently. Our Super-teachers are assisted by AI and can make education truly adaptive to the individual. Instead of every student moving through the same curriculum at the same pace, AI-powered guides provide personalized support exactly when a child needs it, adapting explanations, examples and challenges to how that particular student learns best.

The AI becomes the guide when needed; the teacher becomes the coach, mentor and facilitator of human development.



Personalised feedback

Timely intervention

Stronger learning

More Than a School
A World FULL OF POSSIBILITIES

At Trium, learning extends beyond the textbook. Students explore ideas, discover their strengths and turn curiosity into confidence — across academics, sport and creative expression.

The Early Years

[Grades – Pre-Nursery to KG2]

Our Early Years programme, for ages 3–6, is a play-based, sensory-rich, and developmentally responsive foundation — nurturing curiosity, confidence, and connection from the very first years. **With a 1:12 teacher : student ratio**, every child is seen, supported, and known.

Through daily movement, mindful rituals, and hands-on exploration, our young learners begin building the three foundations of Trium — a strong, coordinated **body**, a curious, questioning **mind**, and an early, gentle sense of **soul.**

Literacy, Numeracy, and sensory play sit alongside music, movement, and outdoor time as the core building blocks of this stage.

Trium has adapted the world renowned Finnish curriculum to Indian context and therefore brings the best of both worlds to Nashik!

The Primary Years

A holistic, inquiry-driven programme that weaves together academics, wellbeing, the arts and physical education — helping every child grow into a confident, caring learner.

What we teach

Language

Building oral, written, and reading skills as the foundation for every subject. Based on NEP, we will be having English, Hindi, Marathi. In addition, a foreign language club will be giving children exposure to a foreign language as well

Mathematics

Numerical fluency through geometry, measurement, and confident mental arithmetic.

Social Studies

Inquiry-based units of study that connect the study of social studies to the real life of the students

Sciences

Sciences at Trium are not just conceptual but focus on the concepts of scientific enquiry and thinking to allow scientific concepts to come to children with ease and without any rote learning. Children do experiments and visit labs for every chapter and understand through doing

Arts

Arts – whether Visual arts, Music or Dance are not an afterthought at Trium. They are integral parts of the student's day at school with a well-designed curriculum and rigor.

Physical & Personal Education

Coordination, teamwork, and confidence built through football, basketball, cricket and a variety of sports.

The Middle Years

A rigorous, balanced curriculum that connects disciplines and sparks bold thinking — building the skills, resilience, and self-awareness students carry into senior school.

What we teach

Language & Literature

Reading, writing, and critical thinking through diverse texts and discussion.

Mathematics

Logical reasoning and problem-solving through applied learning.

Social Studies

History, geography, and society to understand our place in the world.

Science

Scientific concepts through inquiry, experimentation, and real-world connections.

Second Language

Proficiency in regional and world languages such as Hindi/Marathi with an added focus on foreign language.

Sports

Curiosity and discovery through movement, fitness, and open-ended inquiry.

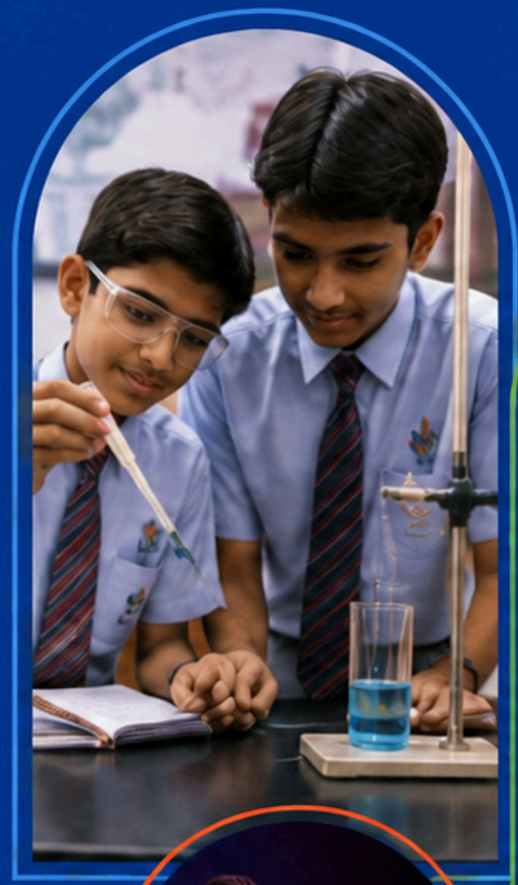
Arts

Creative thinking and expression through visual and performing arts.

Design

Creativity and problem-solving to plan and create purposeful solutions.

EXPERIENCES AT TRIUM



Arts - Music and Dance

At Trium, music, dance and arts sit on the timetable every week — not as an extra, but as a subject every student rehearses, performs, and creates in.

Through composition, choreography, and performance, children build discipline and expression that carry into everything else they do.

- Rhythm
- Expression
- Discipline
- Teamwork
- Memory
- Confidence

Trium Innovators - Coding, Robotics & AI

A hands-on tech track where students design programs, build robots, and explore how artificial intelligence actually works.

Through experimentation, debugging, and iteration, they move from curious users of technology to confident creators of it.

- Coding
- Robotics
- AI & Machine
- Computational Thinking
- Problem Solving
- Collaboration

Sports

Physical education at Trium runs daily, not weekly — sport is treated as essential to how children learn to lead, compete, and recover, not a break from the classroom.

Through games, fitness, and team sport, students build resilience, fair play, and the habit of pushing themselves further.

- Teamwork
- Resilience
- Fair Play
- Coordination
- Leadership
- Endurance

Visual Arts

Visual arts sit alongside maths and language on the Trium timetable — a scheduled, assessed subject where children paint, sculpt, and design every week.

Through drawing, colour, and craft, students learn to observe closely, take creative risks, and communicate ideas words alone can't carry.

- Observation
- Creativity
- Composition
- Craftsmanship
- Risk-Taking
- Self-Endurance

The TRIUM
“Real World Education” model

The TRIUM “Real World Education” focuses on utilization of the theoretical learning into practical application. Students will spend 5 days a month as “Bagless days” where they will work on special projects designed to take their learning into the real-world. In this, they will be guided by special mentors and teachers

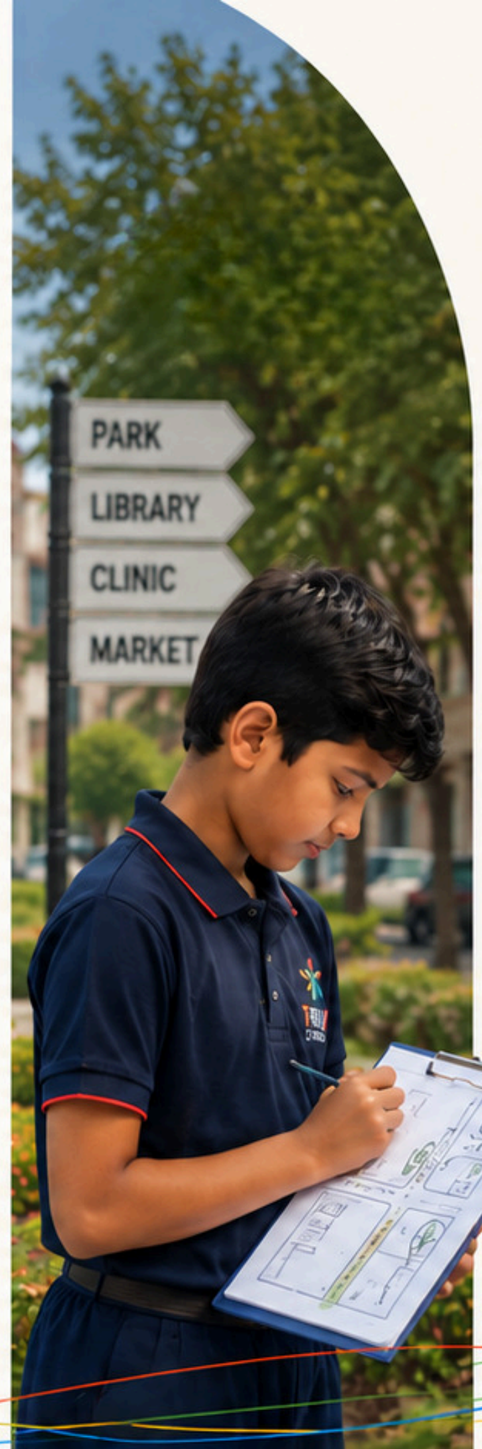
The Kitchen Garden Investigators

Where does our food come from?

Explore seeds & soil

Observe and grow

Harvest and cook



Map My Neighbourhood

How does our neighbourhood work, and who keeps it running?

Explore our community

Meet local voices

Present and propose

Consitution in Our Colony

How do the rights in our constitution show up in everyday life?

Explore our community

Investigate and analyse

Present our findings

The Weather Station Project

Can we predict tomorrow’s weather better than the app?

Observe the sky

Record and analyse

Discover patterns

Admissions Open

Visit & Discover Trium

Schedule a campus visit or join an online session to experience Trium's learning approach, meet the team, and explore the campus.

Apply & Assessment

Submit the online application with required documents. Shortlisted families are invited for the next step:

- **Early Years** — a playful classroom observation with our educators
- **Primary & above** — the Trium Spark assessment

Admission Offer & Enrollment

Selected families receive an offer and complete enrollment. Our team supports onboarding for a smooth, confident start at Trium.
